DETAILED ACTION

1. Claims 1-31 have been examined.

Claim Rejections - 35 USC § 112

2. Claims 1-31 are rejected under 35 U.S.C. 112, second paragraph, as failing to set forth in specifically stated presentation the subject matter which applicants regard as the invention. In particular, applicant should incorporate mathematical expressions to precisely define the means for valuing the portfolio relative to other portfolios, the nature of the first to fifth values and their mathematical structures as well as the mathematical discussion in describing the claims precisely. The claims as presented herein are too broad and not sufficiently distinctive to demonstrate applicant's disclosure in a detail sufficient to permit further review.

Double Patenting

3. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground

Art Unit: 3624

provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

4. Claims 1-31 are rejected under the judicially created doctrine of double patenting over claim of U. S. Patent No. 5,799,287 since the claims, if allowed, would improperly extend the "right to exclude" already granted in the patent.

The subject matter claimed in the instant application appears to be disclosed in the patent and is covered by that patent since the patent and the application are claiming common subject matter, as follows whereby Claims 1-31 in the instyant application appear to overlap claims 1-10 in US Pat. No: 5,799,287.

Furthermore, there is no apparent reason why applicant was prevented from presenting claims corresponding to those of the instant application during prosecution of the application which matured into a patent. See *In re Schneller*, 397 F.2d 350, 158 USPQ 210 (CCPA 1968). See also MPEP § 804.

Conclusion

5. **THIS ACTION IS MADE NON-FINAL.**
